

WITH
POLYKAR,
IT'S IN
THE **BAG!**

The Very Best
in Waste Management

Polykar offers an impressive portfolio of sustainable waste management solutions providing both quality and reliable options for industrial, commercial and institutional markets across North America. Our trash bags are offered in a variety of sizes, colors and gauges.

Premium

Made from 100% recycled material, our trash bags offer superior performance. Guaranteed not to leak, tear or puncture easily, our bags hold up even when filled to capacity.

ESeries

These slightly thinner gauged trash bags represent an economical alternative to our Premium line and are also made from 100% recycled material.

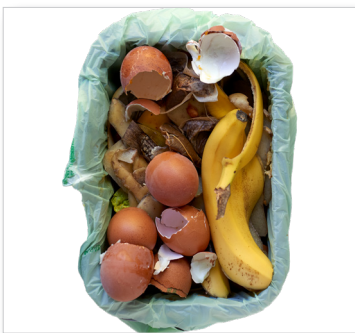

Private Label

Our private-label solution is ideal for national distributors with a high sales volume. You'll receive the same quality and consistency that you'd expect from standard Polykar bags.

High Density

Our high density bags offer excellent strength-to-thickness ratio and are super light. Using up to 50% less plastic, they are perfect for offices or washrooms which collect lightweight waste.

Certified Compostable

Our certified compostable bags are the sustainable solution for organic waste collection. They are easy to manipulate, lightweight, waterproof and are more practical than paper bags.

Mint-X

Mint-X bags are especially made to keep raccoons and rodents away from waste receptacles. They are approved by Health Canada's PMRA and the United States EPA.
